

IPLC

(International Private Leased Circuit)

SimbaNET IPLC (International private leased circuit) is a point to point private connection from anywhere within our Regional Africa network to our partners global PoPs in over 50 countries and territories serving the main business centres, markets and data centres worldwide.

Our IPLC circuits are configured as protected circuits with auto switching backbone protection. Solution is ideal for organisations that have high traffic volume between overseas sites and want the best quality of service equivalent to a layer one link with full control over routing options to design their own WANs or need to support multiple services over a single link.

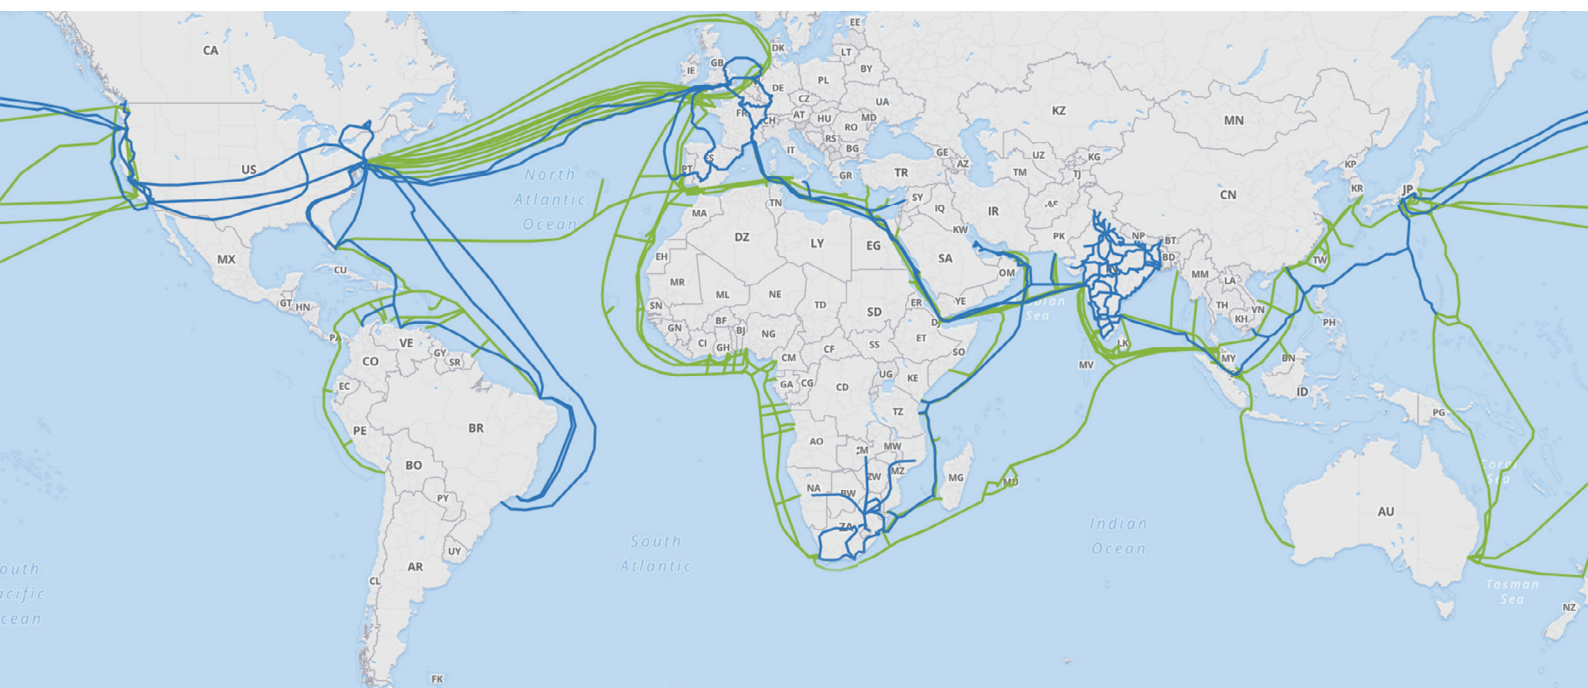

Features

- A protocol agnostic service with a secured bandwidth
- Easy to integrated with other service providers, partners and your existing network(s)
- End to end solution with connectivity to all the major data centres worldwide; single point of contact for your global network requirements
- Dedicated layer 1 bandwidth backed up by service availability and guaranteed SLA
- Full redundancy offered with our diverse engagement with sub-marine cable partners

Benefits

- **Guaranteed data delivery and bandwidth:** Our dedicated Layer 1 point-to-point link ensures seamless transfer of voice, video and mission-critical applications without the risk of downtime or data breach. For quality assurance, SimbaNET offers service guarantee during the provisioning period and service availability.
- **Full control over your WAN:** Autonomy to plan and design your own WAN with deterministic latency. You can also choose the amount of bandwidth required for your data delivery, allowing for better resource utilization. Supported over SimbaNET's infrastructure, our end-to-end IPLC service enables you to have better visibility and monitoring of service quality.
- **Always-on, always-ready operations:** Equipped with restorable cable options, our self-healing networks are resilient against faults and performance issues. With inbuilt redundancy in our core network, you get the assurance of up to 99.9% service availability to ensure smooth business operations with maximum uptime and business continuity.

SimbaNET – Partner Global Network Coverage

About SimbaNET

SimbaNET is a member of Wananchi Group - A Licensed East African Public Data Operator with both Regional and International presence providing high-speed data & Internet Services over Fiber, LTE/4G & VSAT.

We have been in business for over 10 years providing telecommunications services in Africa. Our direct footprints include Kenya, Tanzania, Uganda, Zambia, Malawi and UAE. However, through our partners, we offer services in other countries such as Rwanda, Burundi, SA, Mozambique, Nigeria, Ghana, South Sudan and DRC.

Our Connectivity Solutions includes MPLS, IPLC, DPLC and VSAT.

We're not just about networks, we can also supply voice, security, mobility and cloud services in a Managed Model - acting as the single point of responsibility and ownership for your complete ICT solution.
