I. SimbaConnect

SimbaConnect pioneers in offering Point-to-Point connectivity solutions across many sectors using variety of network connectivity options – ranging from MPLS, VSAT, IPLC and DPLC. We tailor-make our solution, depending upon our client's requirements and location.

MPLS

SimbaNET MPLS solution offers a secure, reliable & cost effective way to connect our Client's offices, remote workers & partners. It provides complete security for data in transit to ensure remote sites & employees have access to business applications & information. Connecting multiple sites to MPLS is a Business VPN-based service which protects all our client's information flows from end to end in more than 30 Countries.

A selection of the latest Value Added Services Portfolio is available along with MPLS. We offer SLA of up to 99.99%.

IPLC

SimbaNET IPLC (International private leased circuit) is a point to point private connection from anywhere within our Regional Africa network to our partners global PoPs in over 50 countries and territories serving the main business centres, markets and data centres worldwide.

DPLC

Some companies require a single dedicated domestic network that enables them to share large amounts of data securely. SimbaNET's DPLC (Domestic Private Leased Circuit) facilitates our clients to share high volumes of data quickly and securely with speeds ranging from 512kbs to 100mbps and beyond on your network at a cost-effective price

VSAT

SimbaNET operates C-Band, KU-Band & KA Band satellite technology, enabling our client's to access high-speed internet & data connectivity; no matter how remote our client's operations are. With speeds of up to 16Mbps our VSAT enables high-performance connectivity which ensures that businesses runs multiple applications such as VOIP, video & data simultaneously without any noticeable service degradation.

2. SimbaManage

SimbaManage is a combination of our Managed Services offerings; aims at proactively managing our client's IT & Network functions. Applying strategic approach to enhance efficiency & optimize cost of operations.

SimbaSecure

SimbaSecure is our systematic approach to managing an organization's security needs.

SimbaSecure service includes round-the-clock deploying, monitoring and management of Unified Threat Management, Intrusion Detection Systems, performing security assessments and security audits, and responding to emergencies.

Professional Security Services (VAPT)

Our Professional Security Services (VAPT) provide recommendations to eliminate or mitigate the risk and we use advanced hacking techniques to safely simulate attempts to gain access to your infrastructure & applications. We provide recommendations to better protect your networks and systems from compromise.

Security as a Service (Managed Virtual UTM)

Managed vUTM is an integrated "all-in-one" network-based security service (firewall, antispam, antivirus, IPS, VPN and web filtering) offered from SimbaNET network. Internet traffic is scanned and cleaned before it reaches the customer premise. Very cost effective as it eliminates hardware costs and based on subscription (Pay as you go) model. The service is fully managed by our operations teams & gives you 24x7 monitoring & access to our dedicated security web portal.

SimbaNET DDoS solution is a Network-based service that addresses distributed threats at the network edge. It scrutinizes traffic in real-time to identify anomalies. Only malicious traffic is blocked – legitimate traffic continues to flow so network & applications remain available.

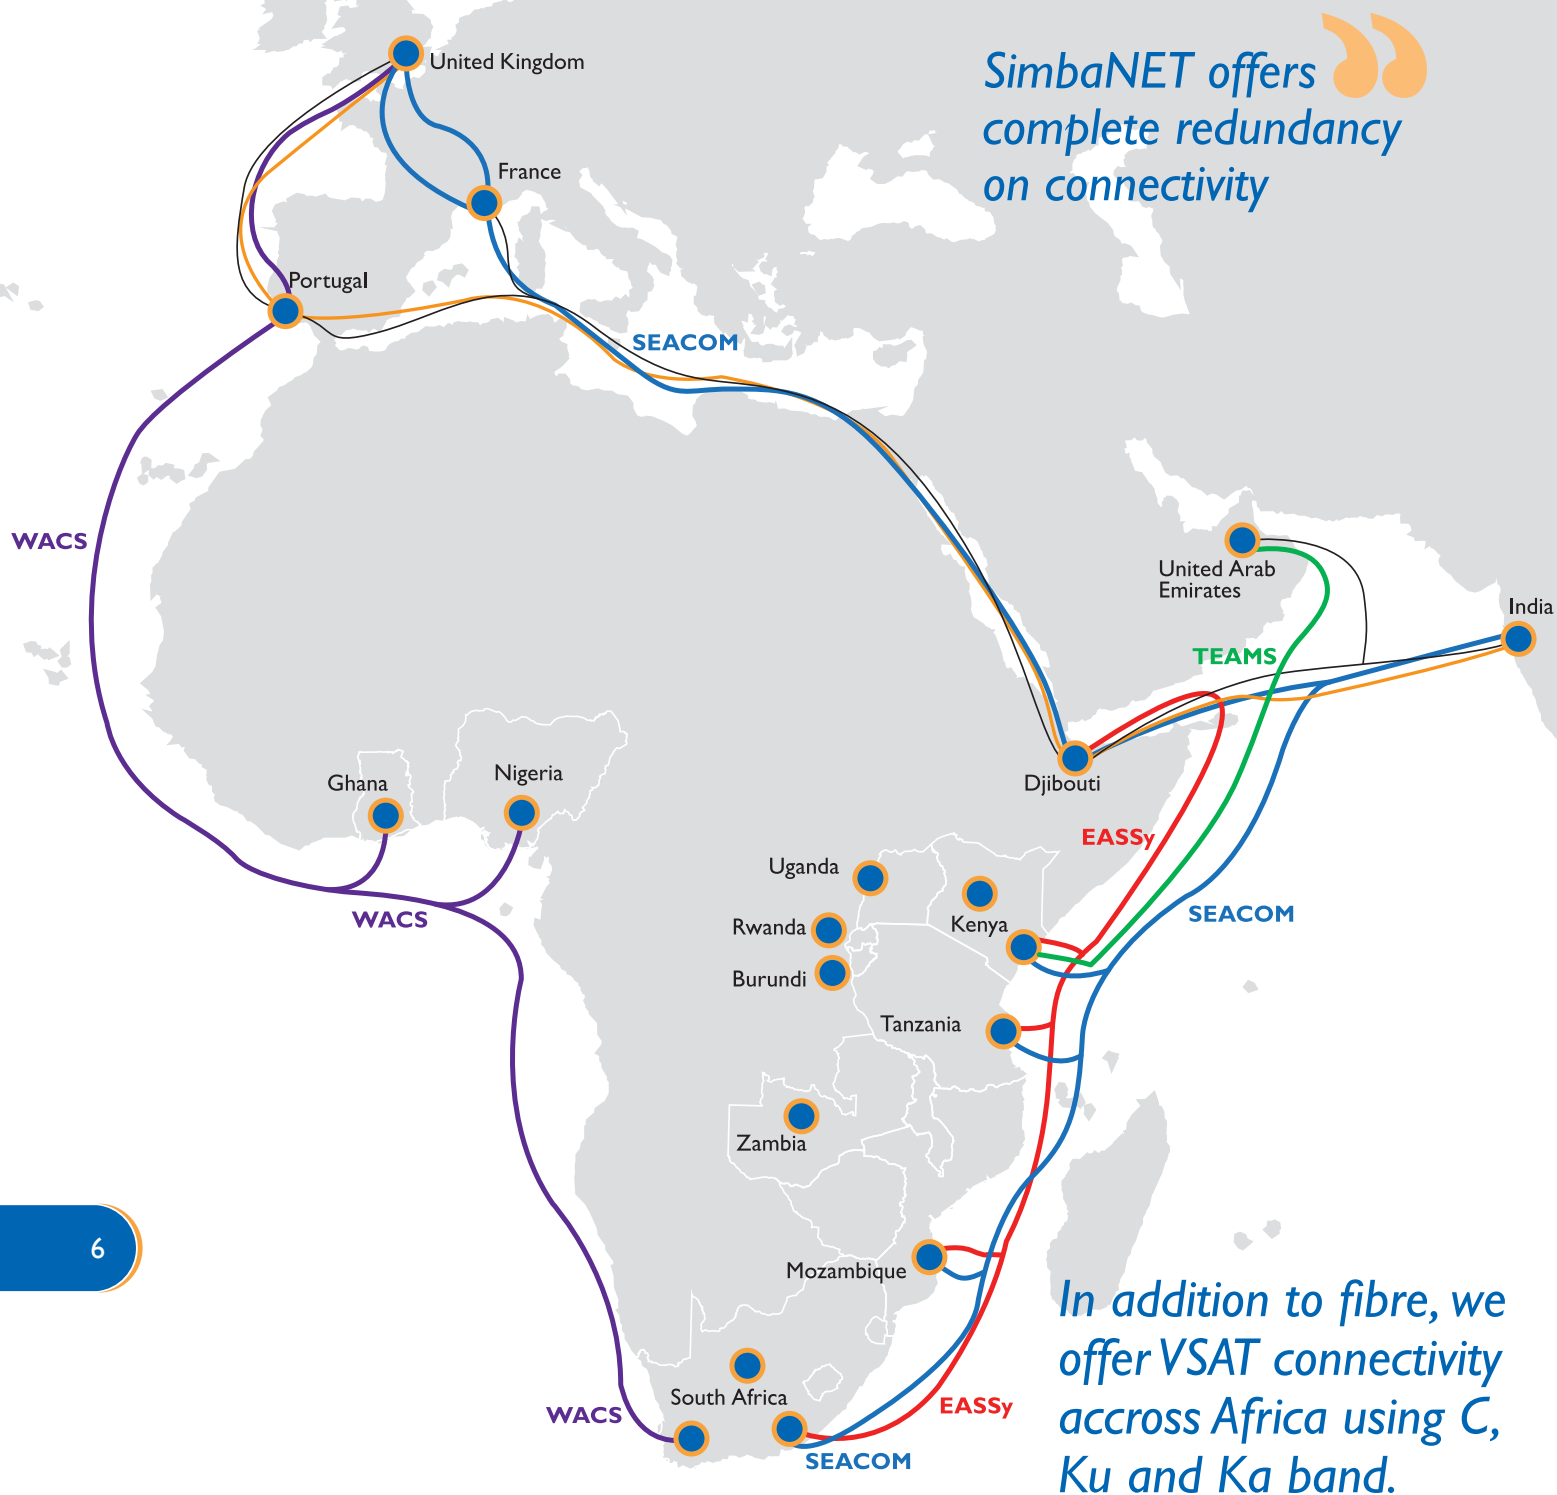

On-Premise Security (Managed UTM)

UTM is an integrated "all-in-one" network-based security service (firewall, antispam, antivirus, IPS, VPN and web filtering) deployed at the customer premises and managed by SimbaNET. This is a dedicated security solution designed to prevent unauthorized connections to networks much more difficult & more readily detectable. We provide installation, monitoring & management services to help respond rapidly to any unauthorized connection. The service is fully managed by our operations teams & gives you 24x7 monitoring & access to our dedicated security web portal.

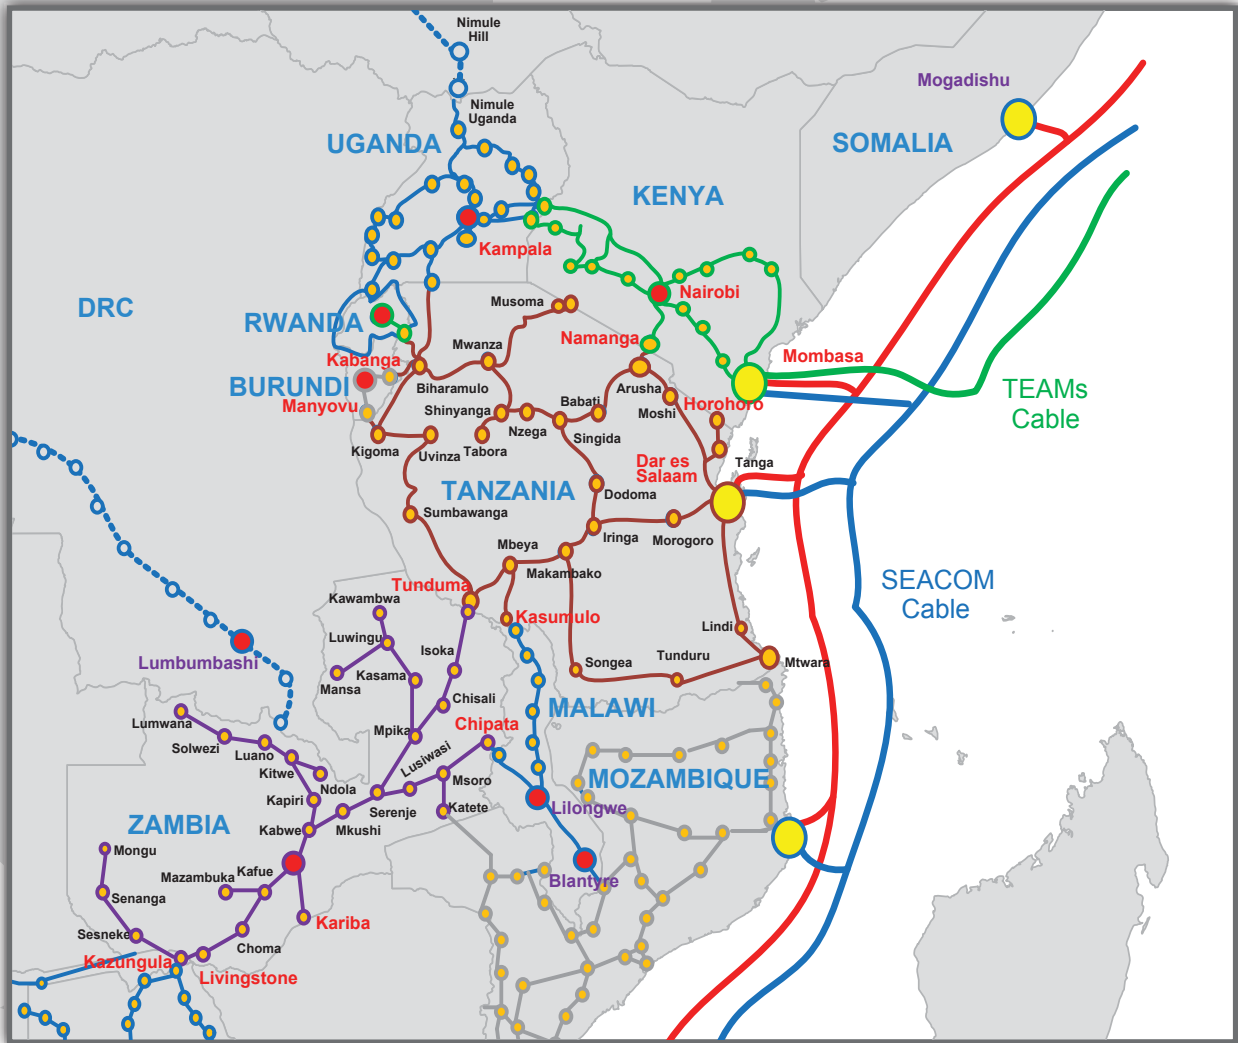

Our Global Point of Presence

SimbaNET offers complete redundancy on connectivity

In addition to fibre, we offer VSAT connectivity accross Africa using C, Ku and Ka band.

Our East Africa Presence

SimbaAssure (Managed Network)

SimbaNET's Managed Network solution is designed to own and lower our Client's TCO (Total Cost of Ownership) by undertaking monitoring and management of their WAN, LAN & Wi-Fi. The solution aims at managing administrative complexity, security, productivity and the availability of applications.

Managed WAN

Our Client's wide area network (WAN) is a critical component of their IT and business operations. It takes dedicated resources, hardware, software, and the latest applications to properly manage it.

Supported by strong service level agreements (SLAs), SimbaNET's Managed WAN services includes proactive monitoring and notification services, isolation of network faults and recommend corrective actions.

Our Managed WAN services supports links and CPE (Customer Premises Equipment) from different service providers.

Managed WIFI

SimbaNET's Managed Wi-Fi solution provides secure Wi-Fi access for our client's employees, students and customers throughout the property. The design will typically include devices such as wireless controllers, Wireless Access Points (or WAPs), switches and extensive cabling.

Our Managed Wi-Fi Services includes, Building and Management of Wi-Fi Infra, QoS, VLAN authorization, 24x7 Support and more... with end to end visibility at a very flexible OPEX based pricing structure.

SimbaNET Conference

SimbaNET Conference is a free UCC (Unified Communication & Collaboration) service offered to our customers through which they can organise conference calls worldwide. Customer creates his account online and can share user access to the conference. Participants call into locally provided number - in country and with that they save on international calls to the bridge. Admin of the account has capabilities to record the conference.

SimbaCloud

SimbaCloud is an enterprise-class scalable cloud infrastructure. It features a service catalogue of standardized server, storage, backup and operating systems infrastructures components that can be assembled to create a customized offer, and a choice of service management and SLAs to suit even the most critical applications.

SimbaWingu

Powered by Cloudberry, SimbaWingu is our cloud backup and storage solution designed to automatically backup files as soon as Internet is connected. The solution also offers deduplication and robust compression ratio to optimize the required storage capacity. Our 24x7 support enables seamless backup and restoration process.

SimbaHost

SimbaHost is our cloud Hosting and Domain solution. We offer a secure, reliable and redundant server infrastructure to suit all your business applications, websites, email and other computing needs. Our aim is to enhance efficiency, offer leading technology and optimize productivity for our clients.

3. SimbaVoice

SimbaVoice offers a complete portfolio of enterprise telephony services that can help our client's business be more productive and provide better services. No matter what the size of organization, we offer Voice solutions to fit client's current needs and growth plans, as well as budget goals.

SimbaTRUNK

This is a virtual pipe in between customers PBX and our switch. It is used for passing voice traffic. Customer receives one number for free which can be used to place and receive multiple calls. Extra numbers can be purchased additionally. We have two flavours – 6 and 30 channels. Extra channels can be purchased additionally.

SimbaCall

SimbaCall is a mobile phone application that allows users to receive and place calls with lower cost. It can be utilised stand alone or in combination with corporate telephony account. A very effective solution for Telecommute users.

SimbaVCC

It is cloud based call centre solution. Customer has capabilities of creating his own scenarios for inbound and outbound campaigns. It consist of cloud base application used by the administrator to create scenario and application hosted at agents machines. There are few different type of dialling that increase productivity – like predictive dialling (increases actual talk time to 45 minutes comparing to regular 30 minutes talk). A great solution for our call centre clients.

4. SimbaSurf

SimbaSurf offers dedicated, high-speed and secured Internet Connectivity to our clients. Speed ranging from 1Mbps to 155Mbps and beyond... with fully supported capacity & guaranteed by our robust SLA.

With our various IP Transit agreements with Global Tier 1 Operators – SimbaSurf offers direct connectivity to Africa, Asia and Europe.

Internet

SimbaNET Internet provides high-quality, worldwide access to the Internet and includes added value, such as managed CPE, IP address and domain name registration, Security, DNS services, and back-up as well as reporting and service level agreements.

IP Transit

SimbaNET IP Transit allows our Domestic and Regional network traffic to cross or “transit” into global networks. Our Service is based on robust SLAs. SimbaNET IP Transit is a viable option as it can save most of the challenges that can arise with peering. It simplifies the complexities of networking to send traffic worldwide.

Our ability to offer multiple underwater cable route, as well as peering arrangements at Internet Exchanges and Service Providers; allows SimbaNET to offer highly reliable, low latency routes for your Internet traffic.

IP POP

SimbaNET IP POP is a business-grade Internet service for organizations heavily reliant on being connected, where continuous, secure and reliable online access is of the utmost importance. Offered over a variety of access channels and partnered with global Tier 1 Operators – we provide direct internet access to Africa, Asia and Europe.

5. SME Suites

SimbaNET SME Product Suites is specifically designed to fit the connectivity requirements of Small and Medium business enterprise and Start-Ups. These SME Connectivity services can be clubbed with variety of Value Added Services.

SimbaSky

SimbaSky is a speedy & reliable enterprise grade Ka-Band Satellite Broadband Service available across East Africa. Ideal for market segments like, Mining, Oil & Gas Industry, Construction, Schools, Agriculture, Hospitable Industry/Tourism, Health Care, NGO's, e-learning, e-governance & many more.

SimbaSky can deliver speeds ranging from 512 Kbps to 10 Mbps with highly flexible and affordable monthly subscription.

SimbaSky Gold

SimbaGold is a high-end Ka-Band service; designed to offer dedicated service with unlimited usage hence no restriction on volume. Ideal for SMEs where high throughput, high availability and high performance is a must. This service also enables us for customizing countless possibilities of quality of service levels, bandwidth management and traffic prioritization.

SimbaSky Platinum

SimbaSky Platinum (Ku-Band service) is ideal for users needing intense VSAT usage for high consumption applications in areas where weather condition is a challenge. Our solutions can be tailored to any specific need and customized to suit bandwidth requirements and budgetary limitations

SimbaBiz

SimbaBiz solution offers a very high bandwidth and hence enables us to deliver all the services over single Fiber, hence no hassle for multiple cable and multiple bills. Our network is extremely flexible to our customer's preference allowing new products and services to be deployed easily from remote location.

SimbaMax

SimbaMax services are dual play services, providing Internet connectivity and Telephony to business users. Being a Wireless broadband service run on licensed frequency eliminating possibility of interference and offers speeds of 512Kbps to 1Mbps. Ideal for Small Offices on remote locations with No-Fiber Infrastructure.
