Case Study Virtual Unified Threat Management

***“a housing finance company, with the vision
of delivering affordable finance options to
middle & lower income groups”***

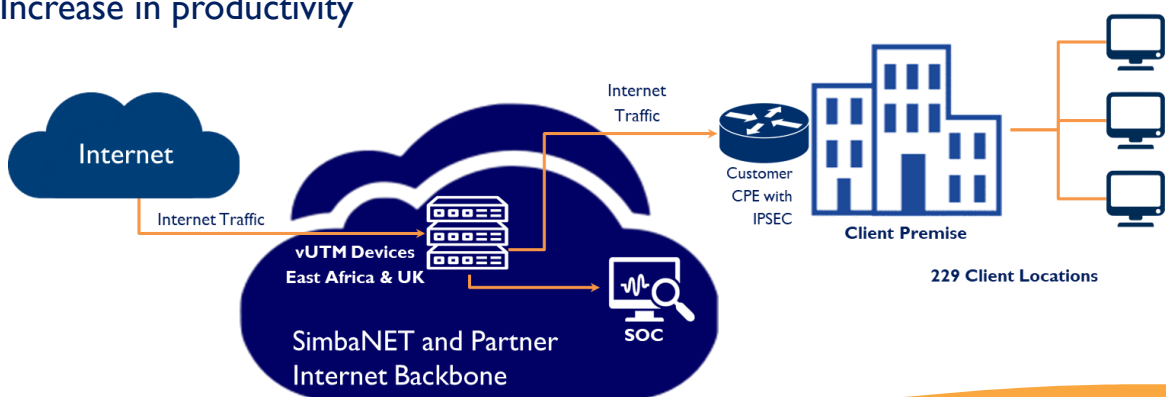

Case Study | vUTM

About Client Requirements

- Require a managed security service which is cost effective, avoids administration complexity, and incorporates best-practices regarding security policy design, implementation and change management of the security systems protecting the critical assets of the business.
- The client requirements
 - 229 remote locations IPSec connectivity
 - 1Mbps for vUTM remote connectivity
 - Remote site to site VPN connectivity required at one of the primary offices of the company

Partner Solution & Benefits

- Proposed cloud-based vUTM solution, aimed at achieving coordinated defence-in-depth to provide comprehensive security coverage across different stages of the network, and mitigate security risks.
- vUTM Service will provide a clean internet pipe, IPS and firewall services at the requested site/sites.
- Trusted partnerships with broadband providers to provide remote connectivity solution
- Enables customer to connect remote sites also on MPLS
- Less hassle as only one service provider to deal with for MPLS
- Increase in productivity
